

## BROW OUTLINE PEN NO MORE UNBALANCED EYEBROWS

- fine tip allows for precise outlining of brow
- specially formulated non toxic skin ink
- intense color retention on the skin

Specially formulated by the Micro-Pigmentation Centre to increase efficiency for all your eyebrow procedures. For those ladies without eyebrows or sparse eyebrows it is important to outline with Brow Outline Pen. This promises balanced eyebrows once the tattooing procedure is completed.

### Procedural Instructions for Eyebrow Tattooing:

Eyebrows need to be thoroughly wiped with an alcohol wipe to eliminate natural skin oils and facial creams. Shape and draw desired eyebrow with a conventional eyebrow pencil. Check for properly shaped and balanced eyebrows with Perfect Balance. Perfect Balance is the perfect tool to help you draw symmetrical eyebrows before you start outlining and tattooing. Outline outside edges with Brow Outline Pen. It is important to outline with pressure and deliberately mark the area to ensure boundary visibility during tattooing procedure. Maintain pen outline close to the edges of the penciled brow, but not touching.

Dry pen with Brow Fan for 2-3 minutes to ensure complete drying before beginning tattooing procedure. Tattooing in between outlined boundaries will promise balanced and symmetrical eyebrows. Do not tattoo on top of the purple Brow Outline Pen.

Price \$ 4.50  
6 Pack \$ 18.00 (get two free)  
50 Pack \$ 135.00
